- The bottom right corner of the slide features a decorative graphic consisting of several concentric circles, resembling ripples in water, rendered in a lighter blue shade than the background.

Topics covered:

- 
- Four sets of concentric circles, resembling ripples in water, are located in the bottom right corner of the slide. They are rendered in a lighter blue color than the background.

Justification

- As per OPNAVINST 5102.1D, & 4630.24, All reportable mishaps are to be reported electronically to COMNAVSAFECEN.
- As per OPNAVINST 3501.225C: All Premeditated Personnel Parachute jumps must be reported electronically to USAQMC&S, Fort Lee, VA through the Naval Safety Center via DJRS.

WESS/DJRS

- Web Enabled Safety System (WESS)-A secure system used to electronically report mishaps directly to COMNAVSAFECEN.
- Dive/Jump Reporting System (DJRS)-A subsystem of WESS, used not only to report Dive/Jump ops, but can also generate unit/individual reports and jump manifests, as well as help units to record & maintain quals, currency, & proficiency.
- A Common Access Card (CAC) is required to log onto WESS/DJRS.

DJRS Capabilities

- Allows commands to query past jumps, cargo drops, & individual parachutists.
- Makes smooth manifests available with a push of a button for inspections.
- Create, route, and approve Para Ops without printing a piece of paper.
- Transfer jumpers to another command without printing a jump report.
- Maintains current physical and HAPS expiration dates for reference.

DJRS Capabilities (cont.)

- Provides Jumper & JM lapse dates and dates of last 4 jumps over the past 6 months.
- Can generate an individual jump report to augment members official jump log.
- OPNAVINST 3501.225C still requires units to maintain a hard copy of manifests for 3 years.
- Same capabilities for the dive side.
- Negates the requirement to generate and send monthly airdrop summary reports.

WESS consists of several subsystems:
